

Vulnerability assessment with local data storage

Holm Security VMP | OnPrem

Holm Security VMP | OnPrem

Holm Security VMP | OnPrem is a market-leading solution for automated and continuous vulnerability assessment for private and public organizations with high internal security demands and strict security requirements towards their supplier.

Sectors

The platform mainly targets:

- Large enterprises
- Government agencies
- Banks and other financial institutions
- Providers of critical digital and physical infrastructure
- Military and intelligence service
- Law enforcement agencies

Automated & continuous vulnerability assessment

Holm Security VMP | OnPrem is a comprehensive platform for network and web application scanning. With our platform you are in control of the security in your networks, systems, web applications, APIs, cloud services and cloud infrastructure. The platform automatically and continuously scans for an ever-increasing number of vulnerabilities. The platform provides several functions for compliance with NIS (Network and Information Security), PCI, GDPR, ISO 27001 and PDPA.

Highest level of security

Holm Security VMP | OnPrem is a complete platform that is installed in your own IT environment on your own hardware. This means that no vulnerable data, without any exceptions, ever leaves your organization. Maintenance and access to the systems from Holm Security is carried out with highest level of security over secure communication routes, by personnel that have passed through background security checks. All tests performed are verified and signed by our vulnerability tests experts.

Scan details

- ✓ Over 68,000 vulnerability tests
- ✓ Automated and continuous scanning of networks, systems and web applications
- ✓ Discovering vulnerabilities in e.g. old software and exposed services and functions, as well as CMS
- ✓ Detects misconfigured systems
- ✓ Detects weak passwords
- ✓ Automatically maps hosts, ports and services
- ✓ Automatic update of vulnerability tests
- ✓ Windows and Linux authenticated scanning
- ✓ High precision with low amount of false-positives

Other details

- ✓ Vulnerability Manager – administration of vulnerabilities
- ✓ Continuous Monitoring – automated monitoring of vulnerabilities, changes and compliance
- ✓ Asset Manager – automated asset management
- ✓ Integration with Jira, Slack and Webhooks
- ✓ API for programmatic integration with e.g. SIEM and CI/CD products
- ✓ Extensive login security, e.g. combinations of 2FA and trusted networks
- ✓ Traceability with audit log
- ✓ Customizable dashboards
- ✓ Detailed device register (servers, computers, etc.)
- ✓ Alarms and notifications
- ✓ Reports in a variety of formats such as PDF, HTML and CSV
- ✓ Compliance reports for PCI, GDPR, NIS, OWASP, ISO/IEC 27001 and PDPA
- ✓ Automated and policy-based remediation
- ✓ Organizer - create a structure with multiple Security Centers

Powerful tools & features

Holm Security VMP | OnPrem includes several powerful tools that allows you to effectively work with vulnerabilities, whether you have a smaller number of vulnerabilities or thousands, such as Asset Management, Vulnerability Manager, Continuous Monitoring and Remediation.

Versatile integrations

Holm Security VMP | OnPrem offers several possibilities for integrations with other solutions. The Platform API makes it possible to integrate with e.g. CI/CD and SIEM products. There are also ready-made solutions for integration with e.g. Jira and Slack. You can also use Webhooks for integration with a variety of systems.

Create your own structure

- effective & safe

Our portal Organizer enables different people and departments to be given isolated access to relevant data in the Security Center, while there's still a centralized administration. This streamlines the administration without compromising security.

Expert assistance & ongoing reconciliation

Our highly competent Customer Success Team and our Security Specialist Team continuously supports you in your work with our platform and to solve vulnerabilities. Through continuous follow-up meetings, we ensure that you make progress, get the most out of the investment in our platform and that you are making progress in the work of reducing the number of vulnerabilities to increase your IT security. Our experts together with our technical functions help you interpret and prioritize the discovered vulnerabilities.

Next-gen vulnerability assessment

Holm Security is a challenger in automated and continuous vulnerability assessment on the global market.

Holm Security is a global company within continuous vulnerability assessments with the ambition of becoming the market leader in Europe and Asia. We currently have offices in 7 countries and operate actively in 15 markets in Europe and Asia.

With state-of-the-art technology and cutting-edge expertise, we offer next-gen vulnerability assessment — easier, smarter, and more cost-effective.

Behind Holm Security are some of Europe's foremost entrepreneurs in IT security.

Welcome to the future of vulnerability assessment!
